

HOW TO ORDER

STEP ONE: Specify **Total Number** of Shades.

STEP TWO: Specify a color that compliments your décor or exterior home color. (See fabric swatches on the reverse side for color options.)

STEP THREE: Specify **Width** and **Length** of Shade.

- Width is **bracket to bracket**
- 7" of cloth is automatically added to length to allow shade cloth to remain wrapped around tube.
- If shade cloth measures more than 96" in width, the maximum length of the shade will be 96". Finished cloth length will be 93".

Outside Mount (figure 3)

- **WIDTH:** When mounting over an outside opening it is recommended to make shade cloth wider than the opening (up to 3" per side) to prevent light from coming through the sides.

NOTE: Shade cloth will be up to 2 ¾" less than bracket to bracket measurement.

- **LENGTH:** Measure the exact length of the opening. If mounting above the window frame add additional inches.

Inside Mount (figure 4)

- When using an inside mount, exact measurements are critical.
- **WIDTH:** Measure the exact width of the opening in 2 places, (1a) in head rail area, and (1b) below center. Use the narrowest dimension.

NOTE: Shade cloth will be up to 2 ¾" less than bracket to bracket measurement. There will be a gap of 1 ½" on each side, if measurement is less than 48" wide. The gap will be 1 ¾" on each side, if measurement is more than 49" wide.

- **LENGTH:** Measure the exact length of the opening.

STEP FOUR: Specify **Rolling Preference**.

- (Figure 5) **Standard** "Forward Roll" (Fabric rolls off the front).
- (Figure 6) **Reverse Roll** (Fabric rolls off the back)

STEP FIVE: Specify **Chain Drop**.

- Sizes available from 2 ft. drop to 18 ft. drop.
- If not specified, the chain drop will be 80% of the ordered shade length.

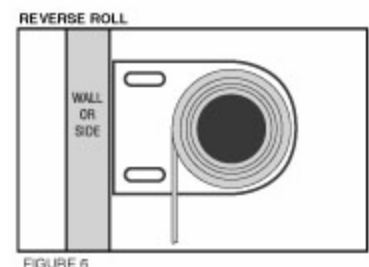

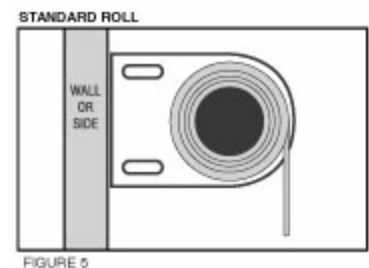

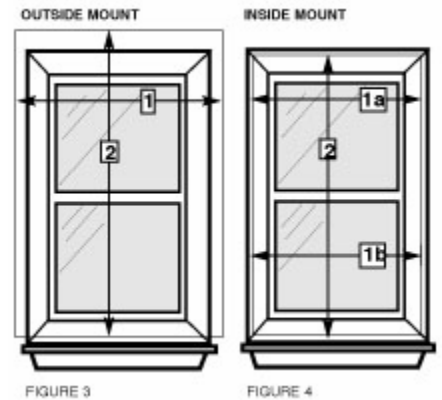

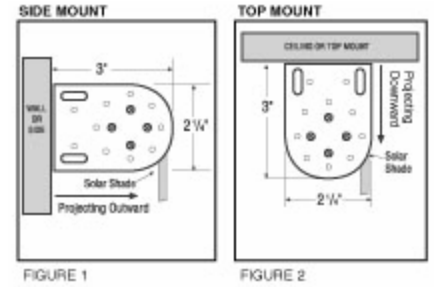

STEP SIX: Specify **How You Will Mount** your shade.

- **Wall Mount:** Brackets projecting away from the mounting surface (figure 1)
- **Top Mount:** Brackets projecting straight down from the mounting surface (figure 2)

STEP SEVEN: Specify **Right or Left Control**.

STEP EIGHT: Optional **Valance**.

- Color matched valance is available at the time of purchase for an additional charge.
